

AD3-5MBIC

Energy Meters Three-Phase

Application

The AD3-5MBIC is the latest in the range of 3 phase 4 wire Din rail meters, which has MID Approval, Appendix "B" and "D" certification. This new meter has been specifically designed with communication as priority. The new AD3-5MBIC comes with RS 485 Modbus communication (Autometers v.6 protocol) and can communicate up to 40 different value parameters.

The meter has a clear LCD display showing kWh import and export with the option of displaying two tariffs with an external time switch.

By using the Modbus channel for communication it is also possible to view via a P.C./ building management system Amps, Volts, Power factor, Frequency Maximum demand and many more parameters.

Overview

The AD3-5MBIC is a 3 phase 4 wire kWh meter, 230/400 volt 50 Hz , 5 amp current transformer operated meter measuring active energy on import and export applications. What makes the AD3-5MBIC unique is that it has RS 485 Modbus communication built into the meter (Autometers v.6 protocol). Using the Modbus it is possible to read a lot more information such as Volts, Amps, Power Factor Frequency and Max Demand other energy parameters are also available.

Function

Display	Unit	ID	Indication
Active Energy	Tariff 1 (M)-(-) kWh	-	Import Indication ←
	Tariff 2 (M) (-) kWh	-	Export Indication →
Voltage Indication	L1, L2, L3	Will illuminate when voltage is present	-
Tariff	T1, T2	Will illuminate indicating present tariff	-
Phase Disconnection		Phase Error	-

Installation

The meter must be fitted in a suitable enclosure.
(See Autometers full range of enclosures).

Terminals 1 and 2 (230V) are used only when you are using more than one tariff.

Terminals 6 & 7 (230V) are only used if you require 2 tariffs.

An external time switch will be required.

Dimensions

Modbus connections.

- D+ = TX- Terminal 2
- D- = TX- Terminal 3
- RT = Internal resistor

Please note for the last meter on the LAN add a link wire between terminal 3 and 4.

(There is an internal resistor built into the meter.)
