1.Introduction

This document provides operating, maintenance and installation instructions for the A-100 series 1 phase 2 wire din rail mounted kWh meters. The A-100 range of meters has four models in the range Starting with the basic A-100P (Pulse Output) to the better communication meters A-100M, A-100MT (RS 485 Modbus) and the A-100B (M-Bus). The Bi directional measurements makes the meter suitable for Active and reactive energy for all power monitoring applications including the new Solar PV requirements for measuring Energy. The A-100MT has the facility for being able to program four tariffs with its built in time switch for monitoring energy in different periods.
